Enter this amount on the "available carry forward" line of next year's Schedule K-81. 6. _____

GENERAL INFORMATION

K.S.A. 79-32,222 provides a tax credit for tax years beginning after December 31, 2006 against the Kansas income tax liability equal to the amount of a taxpayer's "qualified expenditures" for an existing refinery to comply with environmental standards. To qualify, a taxpayer shall apply to the Secretary of Health and Environment for a "certificate of compliance" that the costs were incurred to comply with environmental standards or requirements as specified in K.S.A. 79-32, 222 subsection (a). If the credit allowed exceeds the tax liability in any one taxable year, the excess may be carried forward until used, except that no credit shall be carried over for deduction after the fourth taxable year succeeding the year in which the costs are incurred.

This credit is only available to corporations that are subject to the Kansas corporate income tax (i.e., C corporations) and not available to individuals, partnerships, S corporations, limited liability companies, and other pass-through entities.

Carry Forward of Unused Credits: For tax year 2017 and all years thereafter no new credit or carryforward is available to individuals, partnerships, S corporations, limited liability companies, and other pass-through entities.

Qualified expenditures means expenditures which the secretary of health and environment certifies to the director of taxation are required for an existing refinery to comply

with environmental standards or requirements established pursuant to federal statute or regulation, or state statute or rules and regulation, adopted after December 31, 2006.

Refinery is an industrial process plant, located in this state, where crude oil is processed and refined into petroleum products.
